# Everybody's Talking

Replicated monument: The Taj Mahal in the city of Agra, India, was built in the 17th century by Shah Jahan, a Mughal emperor, in honour of his wife. It's a huge tourist attraction because of its history and detailed latticework. But another Taj Mahal exists that is smaller than the original. This one was built more recently by businessman Anand Prakash Chouksey in Burhanpur in the state of Madhya Pradesh. He wanted to present his wife with a special gift, so he had the building constructed on their large property, at a cost of 20 million Indian rupees. The couple lives in the home and allows visitors to come onto the grounds to take pictures.

Costumed chase: Someone at Japan's Kamine Zoo, located in Hitachi City, may have seen an unusual sight. A zoo worker, dressed in a bear costume, was being chased by other zoo employees and emergency personnel. But the scene was all planned. The zoo and emergency agencies were participating in an escaped animal drill. The scenario was based on the assumption that an extremely intense earthquake could break a glass window and allow a bear to escape from its enclosure. Strategically positioning their vehicles, and using nets, the participants were able to corner the fake bear so they could return it

Food criminal: Eating and running is criminal, but a Dutch man outdid himself by committing this crime 127 times over the course of a few years. The man, from the city of Delft, didn't cheat the restaurants by dining and dashing. Instead, he would fake illness just before the bill came. In a recent attempt, paramedics were called, but when they found nothing wrong with him, they refused to take him to a hospital. The restaurant owner, feeling sorry for the man, suggested he pay later and took his address. That exposed the scam because he'd given different information to the paramedics. Police investigated and found 127 complaints from other restaurateurs about the man.

Speed traps: In Italy, a criminal has become known as "Flexman." People gave him the nickname because he uses a tool called an angle grinder, which was invented by a company called Flex, to cut down the poles that hold speed cameras. No one knows who Flexman is, but motorists are fans because they don't like paying the fines for speeding that's caught on camera. However, authorities are quite concerned about this vigilante's actions because he is harming the country's infrastructure and causing many thousands of euros in damages. Police say the speed traps work to make roads safer because they encourage drivers to slow down.
